

— FOR EVERYONE AT U-GO

Make anything on-brand, *in one line.*

PowerPoints, Word documents, PDFs, web pages, emails and social posts, in the official U-GO style. Works in ChatGPT, Claude, Gemini or Copilot. Nothing to install.

**1****OPEN A NEW CHAT**

In ChatGPT or Claude.
Always start a new chat for a new piece of work.

2**PASTE THE LINE**

Copy the line below and change the end to what you need.

3**DOWNLOAD YOUR FILE**

The AI fetches the logo, colours, fonts and silhouettes itself.

COPY THIS LINE

Read <https://ugo-brand.netlify.app/ai> and use the U-GO brand to make me a 6-slide PowerPoint about our Nepal programme.

Change “a 6-slide PowerPoint about our Nepal programme” to anything: see page 2 for ready-made lines.

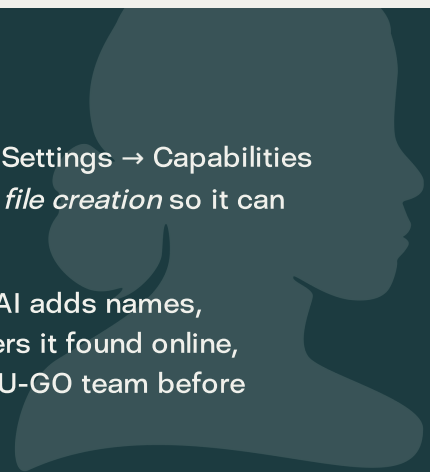

GOOD TO KNOW

Can't open links? Turn on web search in that chat and paste the line again.

Want changes? Just ask in the same chat: “shorter”, “add a slide on costs”, “make the title slide Royal Blue”.

Using Claude? Turn on Settings → Capabilities → *Code execution and file creation* so it can make files.

Check the facts. If the AI adds names, programmes or numbers it found online, confirm them with the U-GO team before sharing.

— COPY, PASTE, ADJUST

Ready-made lines *for everyday work.*

Copy a whole box into a new chat. Replace anything in [square brackets] with your details.

POWERPOINT

Read <https://ugo-brand.netlify.app/ai> and use the U-GO brand to make me a 6-slide PowerPoint for donors about [our Nepal programme].

WORD DOCUMENT

Read <https://ugo-brand.netlify.app/ai> and use the U-GO brand to make me a two-page Word document about [our 2027 scholarship appeal].

PDF ONE-PAGER

Read <https://ugo-brand.netlify.app/ai> and use the U-GO brand to make me a one-page PDF for donors about [how a scholarship changes a family].

WEB PAGE

Read <https://ugo-brand.netlify.app/ai> and use the U-GO brand to make me a one-page web page for [our 2027 appeal], as a single HTML file I can open in my browser.

SOCIAL POSTS

Read <https://ugo-brand.netlify.app/ai> and use the U-GO brand to write three LinkedIn posts announcing [50 new scholars], with a square image for each.

EMAIL

Read <https://ugo-brand.netlify.app/ai> and use the U-GO brand to write a thank-you email to [guests at our London dinner].

POSTER OR FLYER

Read <https://ugo-brand.netlify.app/ai> and use the U-GO brand to make me an A4 poster for [our fundraising dinner on 12 March at The Old Hall].

INSTAGRAM IMAGE

Read <https://ugo-brand.netlify.app/ai> and use the U-GO brand to make me a 1080×1080 Instagram image with our tagline.

RESTYLE YOUR OWN FILE

Read <https://ugo-brand.netlify.app/ai> and use the U-GO brand to redesign the attached document. Keep my words; change only the design.

WRITE THE WORDS FOR YOU

Read <https://ugo-brand.netlify.app/ai> and, in the U-GO voice, write a 150-word introduction to U-GO for [a corporate partner].

Tip: attach your own notes, report or photos to the chat and say “use the attached”. Real photos of scholars always look better than placeholders. Only use them with consent.

— IF SOMETHING GOES WRONG

QUICK FIXES

"I CAN'T OPEN THAT LINK"

Turn on web search or browsing for the chat (the "+" or tools button) and paste the line again.

IT DESCRIBES THE FILE BUT DOESN'T MAKE ONE

Reply: "Please create the actual file for me to download." In Claude, check that *Code execution and file creation* is on.

IT ASKS YOU FOR BRAND FILES

Download the brand pack from ugo-brand.netlify.app/brand-pack.zip and attach it to the chat. Don't unzip it.

THE FONTS LOOK DIFFERENT

PowerPoint and Word show the U-GO fonts only if they're installed on your computer. Otherwise they use close standard fonts. Web pages and PDFs use the real fonts.

— OPTIONAL • SET UP ONCE

NEVER PASTE THE LINK AGAIN

CLAUDE

1. Download the brand pack: ugo-brand.netlify.app/brand-pack.zip
2. Settings → Capabilities → turn on *Code execution and file creation*.
3. Customize → Skills → Upload skill → choose the zip.
4. From then on, just type: U-GO: make a 6-slide PowerPoint about [topic].

CHATGPT

1. Create a Project called "U-GO".
2. In the project's instructions, paste:

Follow the U-GO brand at <https://ugo-brand.netlify.app/ai> for everything in this project.

Chats inside that project are then on-brand automatically.

THE BRAND AT A GLANCE**THREE FONTS****MD 10 FOR HEADLINES**

Simula, *often in italic*

David for everything you read
